

MULTICOLONNA

Traditional style with modern technology

The Multicolonna radiator provides all the comfort of our standard radiators, but with an elegant, traditional finish.

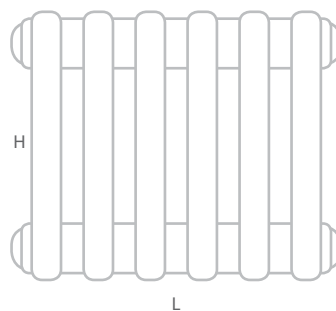

The Multicolonna Radiator by DeLonghi

A popular choice for renovated homes due to its traditional style, the Multicolonna can be either wall hung or set on traditional feet. Its traditional style can be given a more contemporary edge with custom colour choices (the radiator comes in white as standard). DeLonghi's in-depth study of thermodynamic flows has made this radiator one of the best blends of efficiency and design on the market and, of course, it comes with DeLonghi's 25 year guarantee.

Available Models

The Multicolonna is available by indent order only. As such, we can import the exact size required for your project direct from the manufacturing plant in Italy.

It comes in sizes ranging from 300 to 3000mm high and 486 to 2786mm long. Depth depends on the number of columns, which ranges from two to six. The Multicolonna's output ranges from 100 to 10,000W. The size of the radiator is determined by output requirements and the space available.
