

Plate Heat Exchangers

Fiorini has supplied the plate heat exchangers **that equip the GST3 system** aimed at the cooling of the transfer and launch stations of the Ariane Sud.

Gasketed and brazed plate heat exchangers

Customized and efficient options for all your requirements for heat exchanging

The gasketed plate heat exchangers (K and F series) and brazed plate heat exchangers (P and WP series) are the option for someone who demands efficiency and trustworthiness. Our thirty years' experience in this sector makes it possible to meet every requirement, in a residential as well as an industrial setting. We guarantee support during the design phase, the installation phase and after sale.

Gasketed exchangers

Our gasketed plate heat exchangers have the following features:

- designed to improve the exchange performance and to reduce and simplify the maintenance operations;
- use of high quality materials which can be paired with a wider range of fluids and applications;
- custom made production
- design of modular and customized solutions;
- easy to inspect

Brazed exchangers

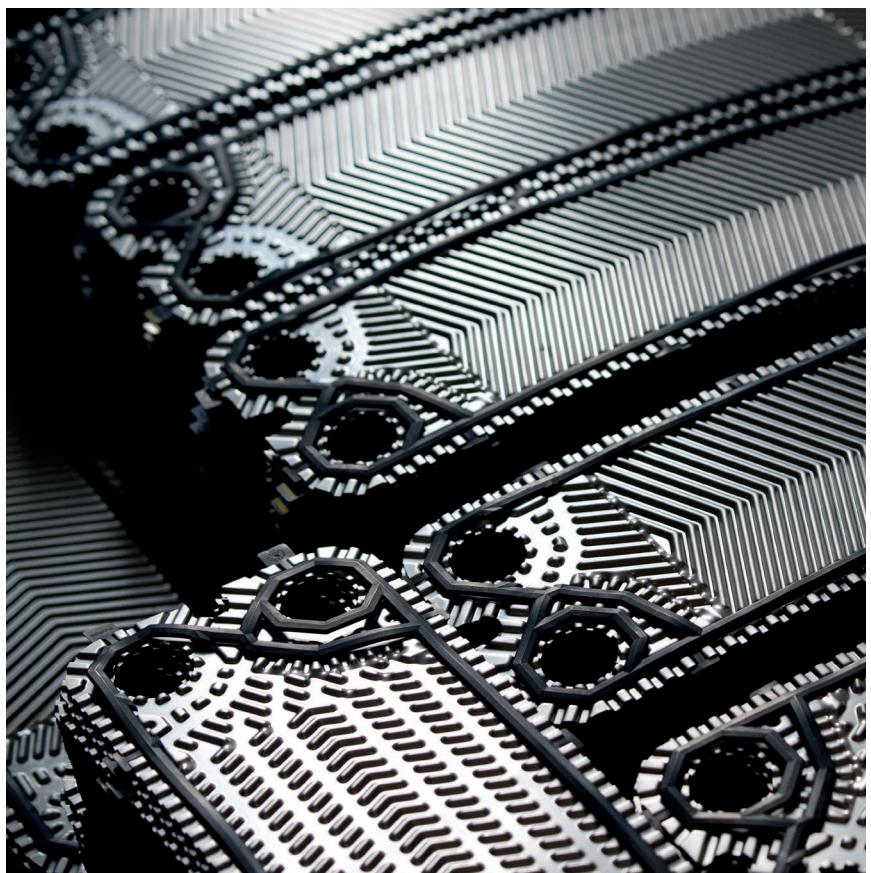

The quality of the parts, as well as the brazing process makes it possible to attach the plates without using gaskets. This is a huge advantage because it makes the exchanger compact and resistant to high temperatures and pressure.

Gasketed plate heat exchangers K and F series

The heat exchangers (K and F series) are designed and manufactured with materials and applications which guarantee high, durable efficiency standards in residential applications as well as industrial processes.

- The plates are made in high quality materials which makes it possible to reach an excellent overall heat exchange coefficient and guarantees resistance against corrosion;
- The plates can be manufactured with several corrugations which improve the exchange performance in function of the operative conditions (fluid type, viscosity). Their particular conformation makes the fluid in the device move turbulently and guarantees an elevated heat exchange coefficient.
- The lining is available in several materials, adapted to the different applications (gasoline, oil, alimentary fluids, aggressive fluids, high temperature fluids, etc.) and desired performance;
- The frame is made of varnished carbon steel, designed in such a way that it can be easily accessed, inspected and maintained;
- All exchangers are tested (leakage test) before dispatch in order to verify possible losses.

Gasketed plate heat exchangers K and F series

Environment and sectors of application

Wherever a heat exchange between two fluids takes place, the Fiorini plate heat exchangers guarantee a series of significant advantages:

- high efficiency
- long life span
- low cost
- compact dimensions
- possibility to expand
- easy maintenance
- trustworthiness

The Fiorini heat exchangers are products of reference in the residential and industrial sectors (HVAC, food, chemical, renewable energy, cooling, oil and gas).

They offer the best options for numerous applications, such as:

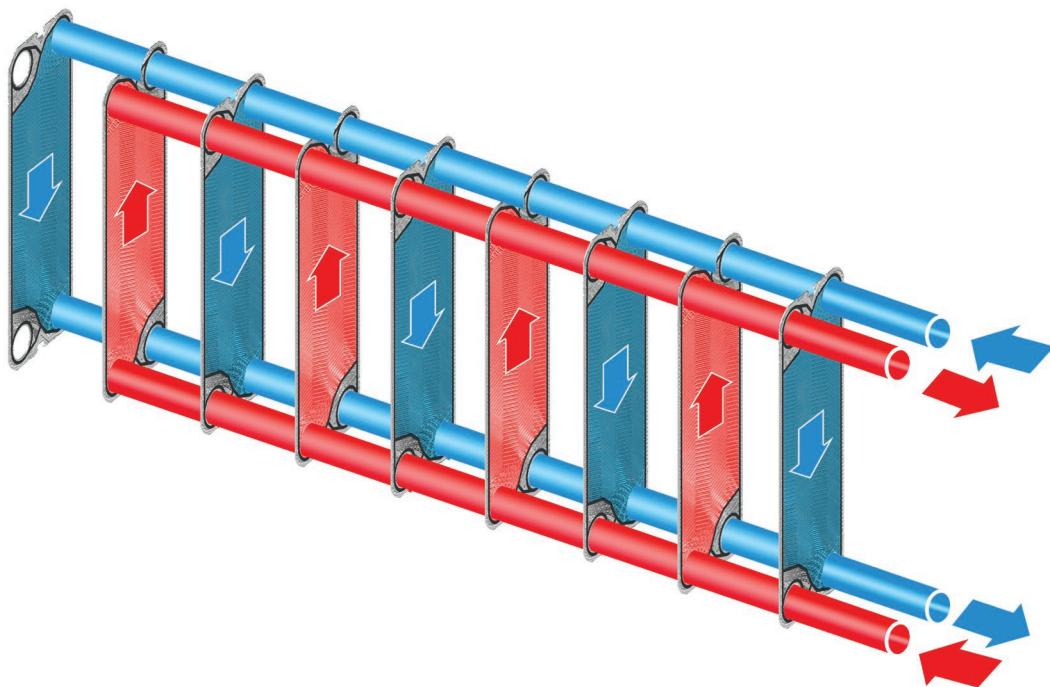

- DHW production
- heat exchanging in heating systems
- teleheating
- pool water heating
- solar power systems
- heating/cooling of alimentary fluids (milk, beer, wine...)
- cooling of machines
- recuperation of heat from industrial processes
- hydraulics

Principles

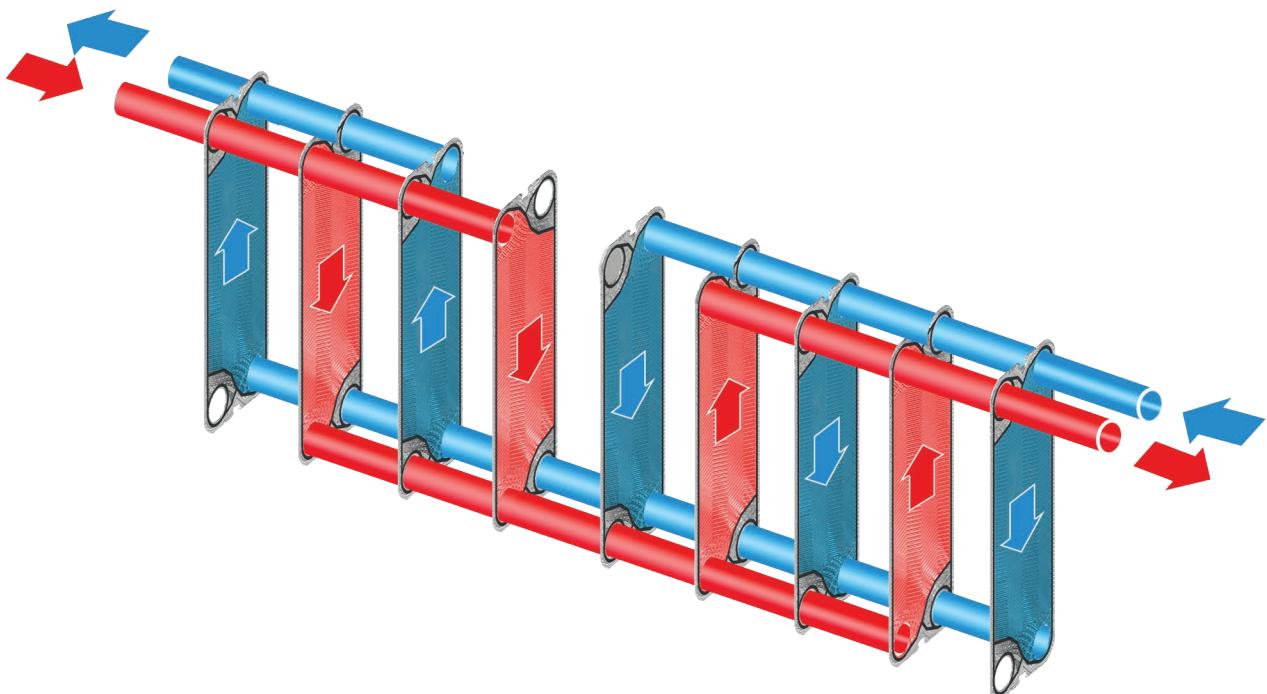

Single passage

In the version with a single passage the fluid which runs through the exchangers, goes through one canal (the space between two adjacent plates). This is the most commonly used layout.

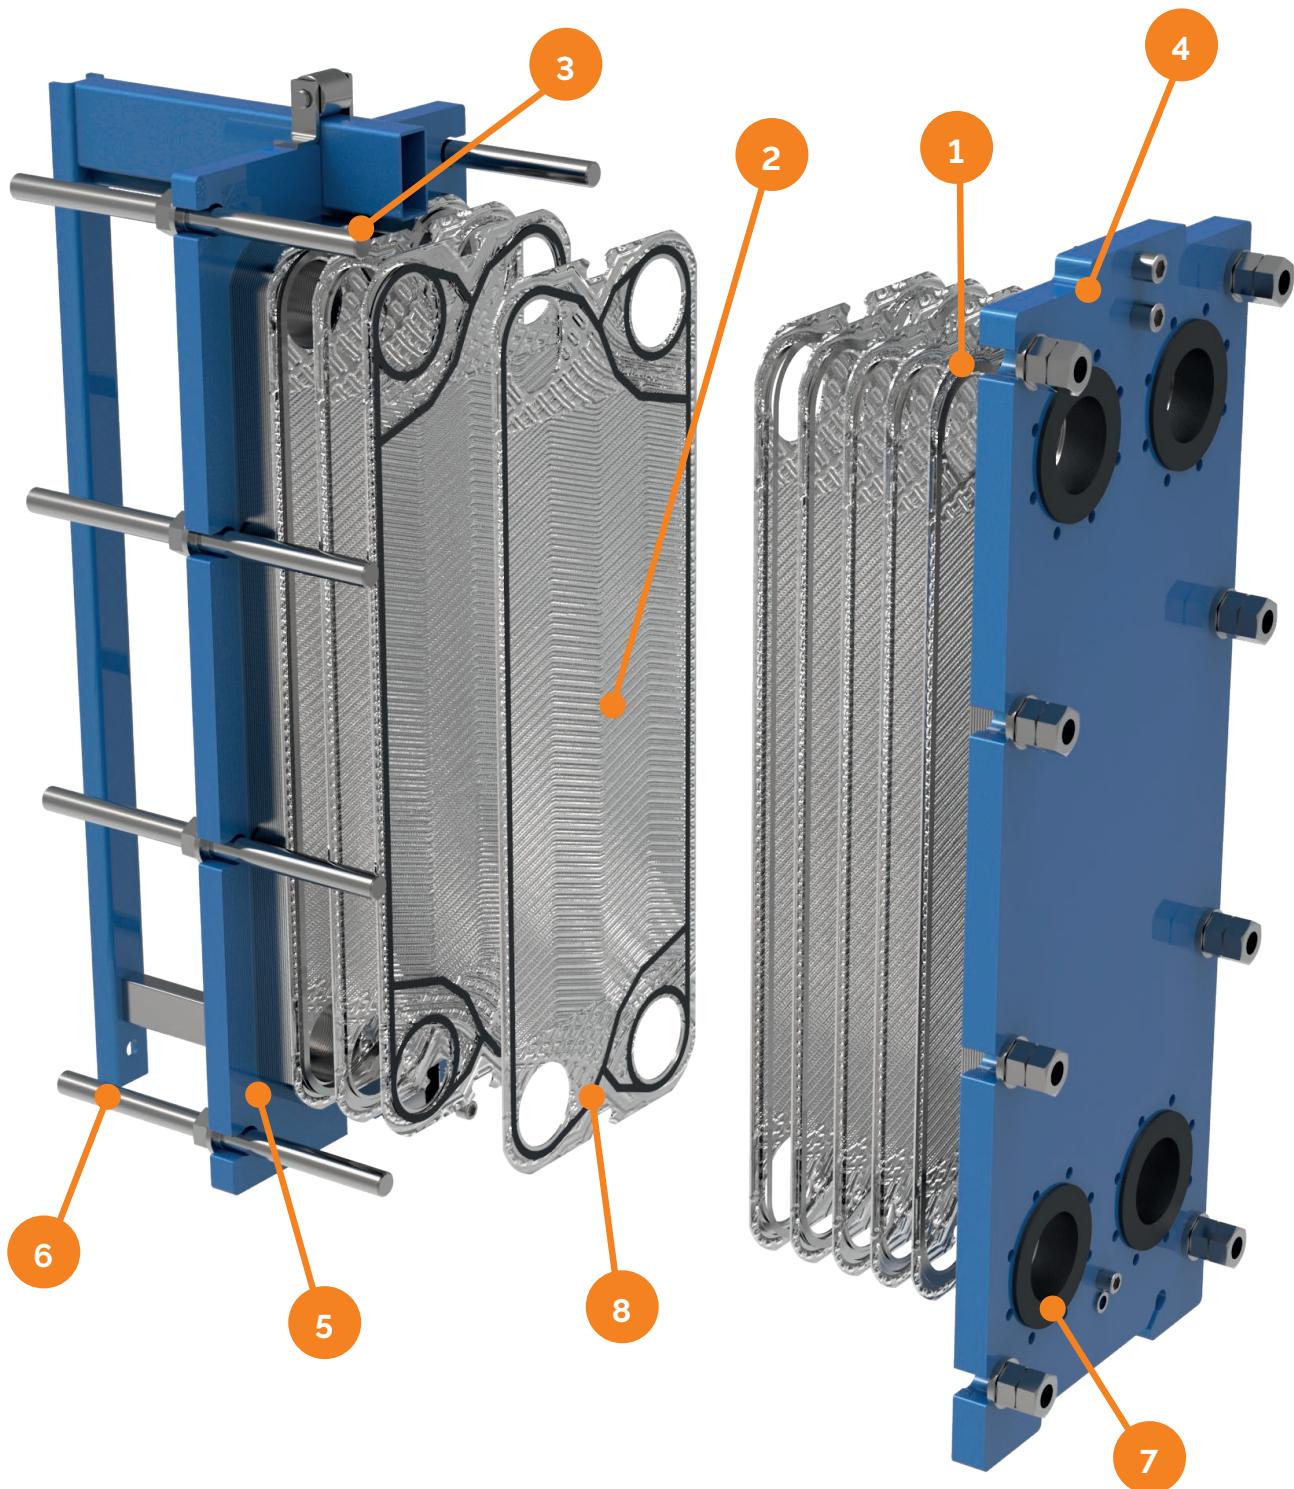

Multiple passage

In this version the thermal length of the exchanger increases with the number of passages (double length with 2 passages, triple length with 3 passages, etc.) This solution is necessary when there is a very low temperature difference between the primary and the secondary circuit.

Main components

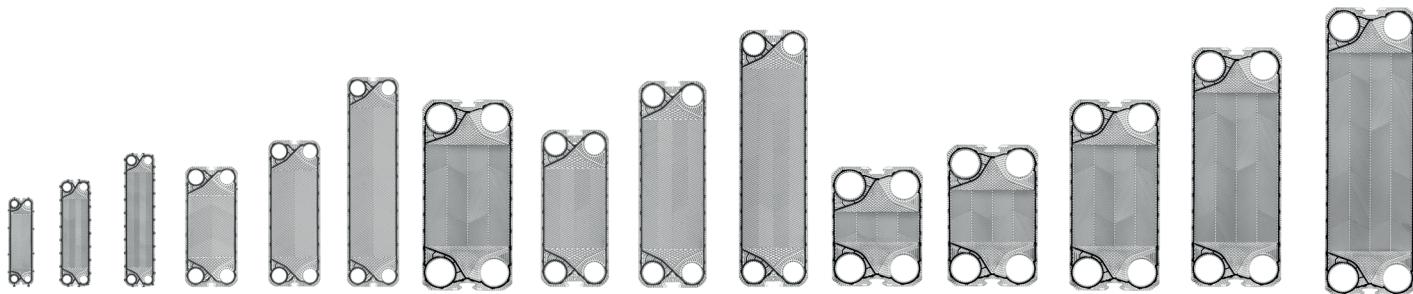

Legend

1. anterior plate
2. mid plate
3. posterior plate
4. fixed cover
5. movable cover
6. tie rod
7. coupling
8. gaskets

Fiorini Plate heat exchangers are designed to ease access and maintenance. Furthermore, its modularity allows to increase number of the plates according to the heat exchange requirements.

Gasketed plate heat exchangers

Corrugations

The plates are available with various corrugations and can be combined in order to reach better performances.

H: this type of corrugation maximizes the thermal power which is exchanged

L and V: these versions minimize the pressure loss

Available materials

Model	Plates			Gaskets			Covers		Tie rod

Legend: ✓ standard ○ upon request - not available

F serie available upon request with plates in the following materials: 245 SMO, AISI 904L, ALLOY C276.

Gaskets

The gaskets are attached to the plates through a clip-on system, which ensures hygiene and easy maintenance and does not use glue and solvents. The particular conformation of the gaskets creates a double barrier and prevents accidental contamination of the two fluids, also in case of loss. The gaskets are available in various materials, to be used in function of the different user parameters:

- **NBR** (nitrile rubber): generally used with water, other liquids, oily mineral liquids T max 130C
- **EPDM** (ethylene-propylene rubber): broad range of use, such as with non-mineral oils, water and steam T max 150C
- **VITON** (fluoro rubber) extremely resistant to chemical substances or aggressive fluids (sulfuric acid, vegetal oil) and high temperatures (Tmax 195C)

Fluid/material compatibility

In the table, some guidelines for the correct combination of materials are outlined.

** Use 254 SMO - AISI 904 L - Alloy C276 plates

Couplings

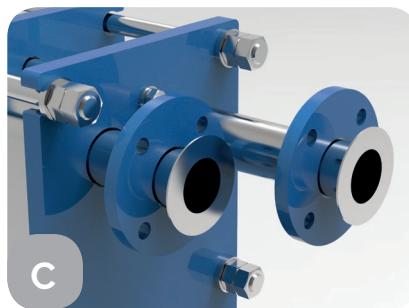

Our gasketed plate heat exchangers can be manufactured with numerous kinds of couplings, threaded, with a free flange, with a welded flange and with liner. Liner is the coating in the shaft connection edges, that can be made of steel or rubber.

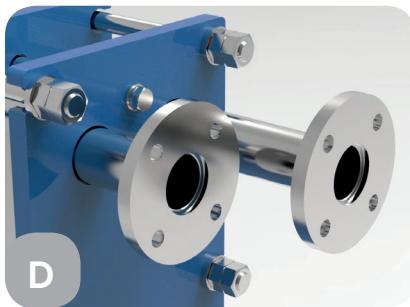

A
Threaded coupling
(steel or nylon)

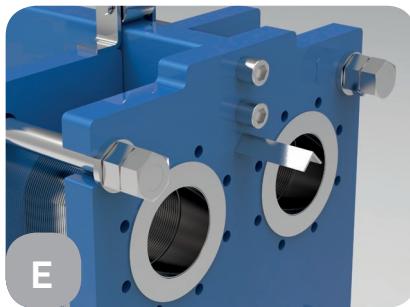

B
Victaulic coupling

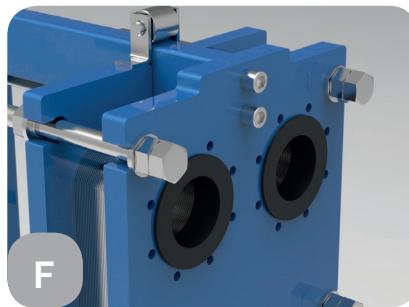

C
Free Flange coupling

D
Welded Flange coupling

*Accessories see pag. 37 (See Model and plates number)

The solar thermal makes it roughly 0.8 kW/m².
Example 10 Fiorini collectors H2500 (pag. 254) is equal to 25m²= 20kW

Alternative solution with brazed heat exchangers: see pag. 57

Brazed heat exchangers P and WP series

The brazed plate heat exchangers (P and WP series) are used in heating, cooling and heat recuperation systems. The quality of the parts and the brazing process, which is carried out with care, make a trustworthy product. The plate design makes it possible to reach higher heat exchange performances and lower pressure loss. Moreover, the product has an elevated resistance to high temperatures and pressure.

Our brazed plate heat exchangers can be used with many kinds of fluids in various combinations (ex: water/water, water/oil, water/steam, steam/oil, Freon/water, etc.)

Advantages

- compact design
- reasonable weight
- high heat exchange efficiency
- high temperature range (-160/+ 195 °C)
- high max operating pressure (30 bar)

Main applications

- heating/cooling of technical water or industrial fluids
- evaporation and condensation of refrigerant gas
- hydraulic separation of the circuit
- heat recuperation in domestic applications and industrial processes
- functioning with a wide range of compatible fluids
- mechanical and chemical resistance of the materials

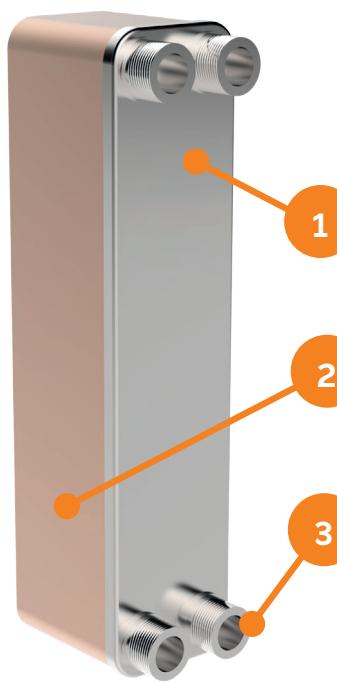

Brazed heat exchanger Range

Model	WP4	P4	P7	P15	P30

***Accessories see
pag. 49 (See Model
and plates number)**

The solar thermal makes it roughly 0.8 kW/m².
Example 10 Fiorini collectors H2500 (pag. 254) is equal to 25m²= 20kW

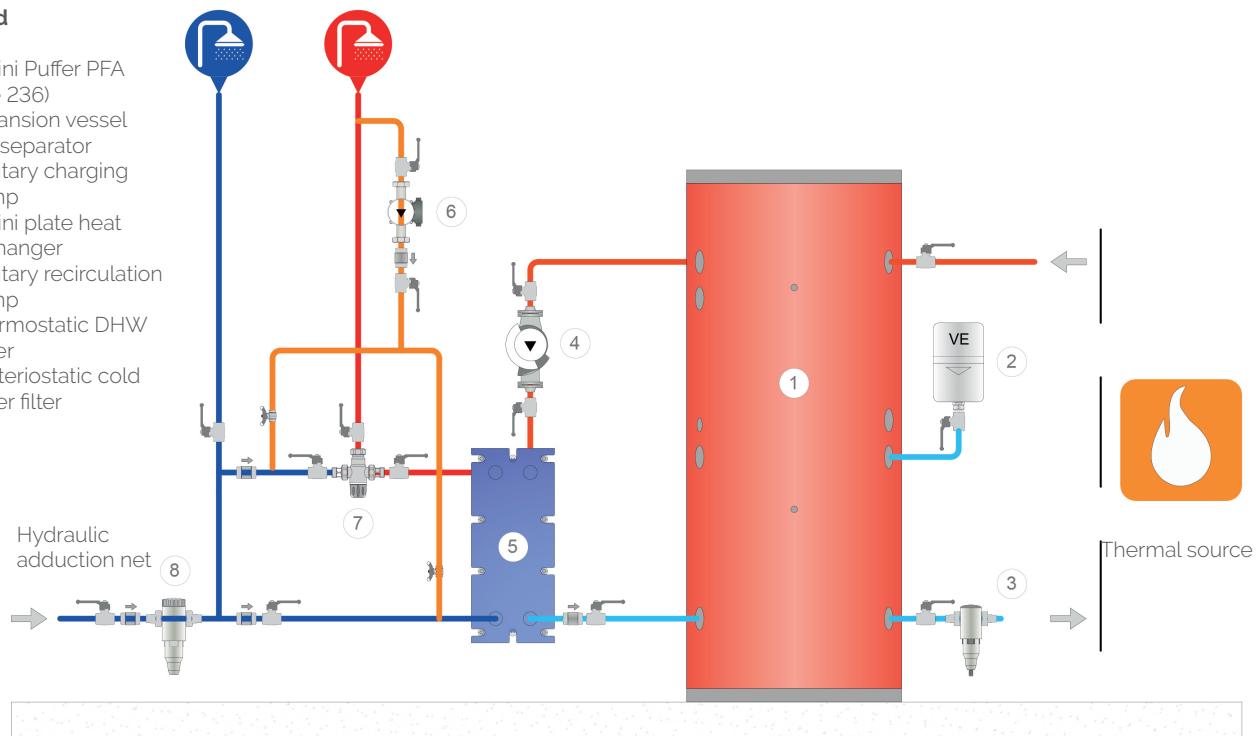

Alternative solution with gasketed heat exchangers: see pag. 46

Plant Solutions

Instantaneous DHW (see SET pag. 214)

Legend

1. Fiorini Puffer PFA (see 236)
2. Expansion vessel
3. Dirt separator
4. Sanitary charging pump
5. Fiorini plate heat exchanger
6. Sanitary recirculation pump
7. Thermostatic DHW mixer
8. Bacteriostatic cold water filter

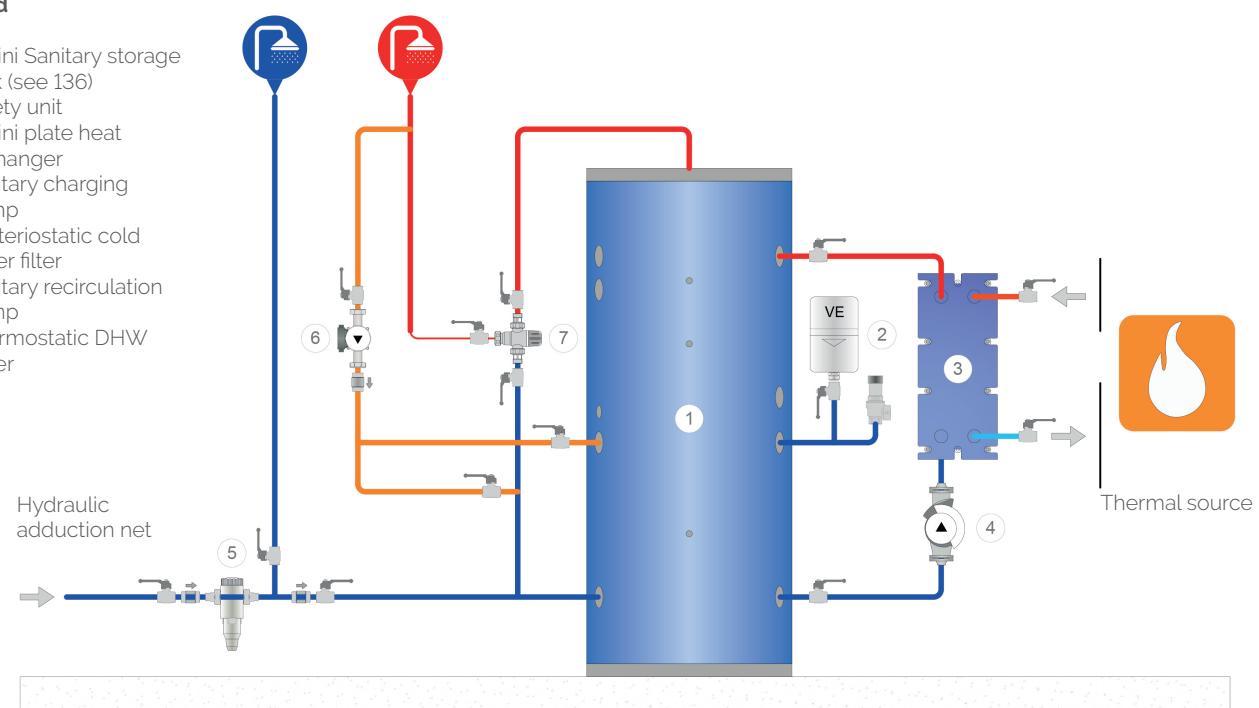

SET fresh water station see pag. 214

DHW with storage tank (see AFK pag. 214)

Legend

1. Fiorini Sanitary storage tank (see 136)
2. Safety unit
3. Fiorini plate heat exchanger
4. Sanitary charging pump
5. Bacteriostatic cold water filter
6. Sanitary recirculation pump
7. Thermostatic DHW mixer

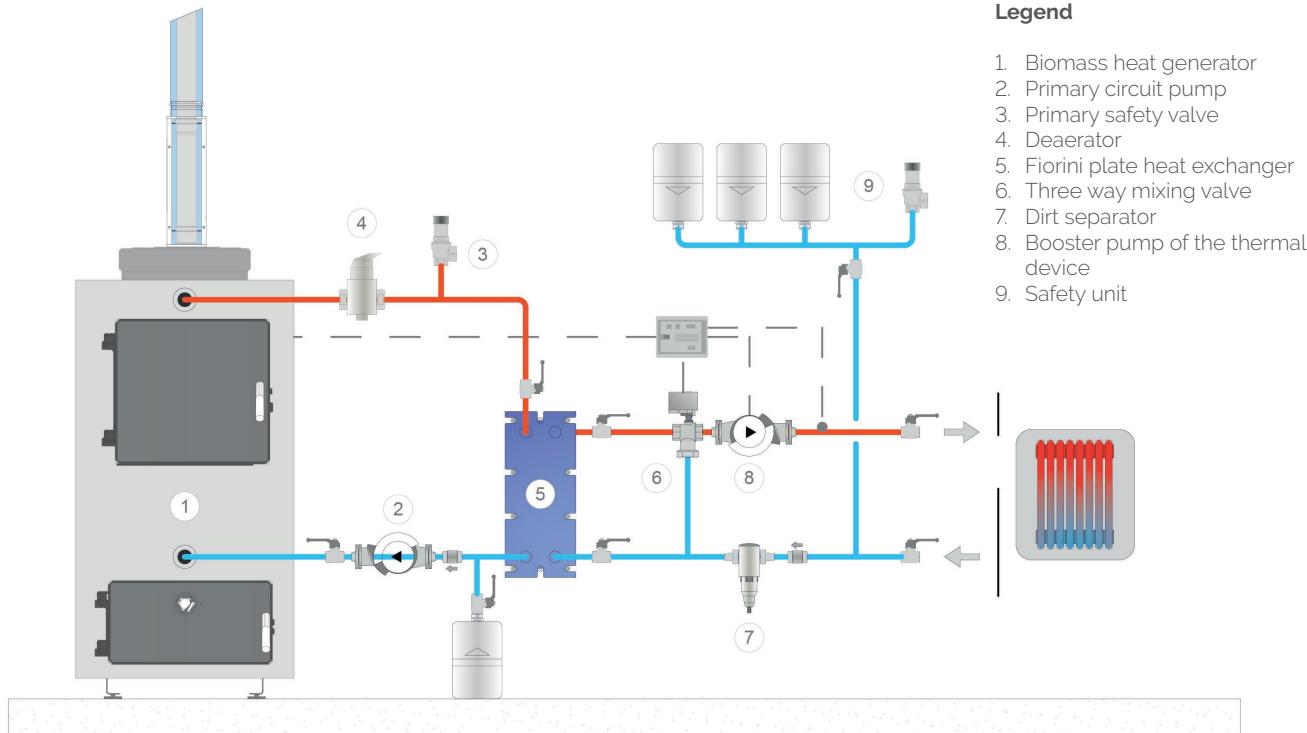

AFK fast heater see pag. 184

Plant Solutions

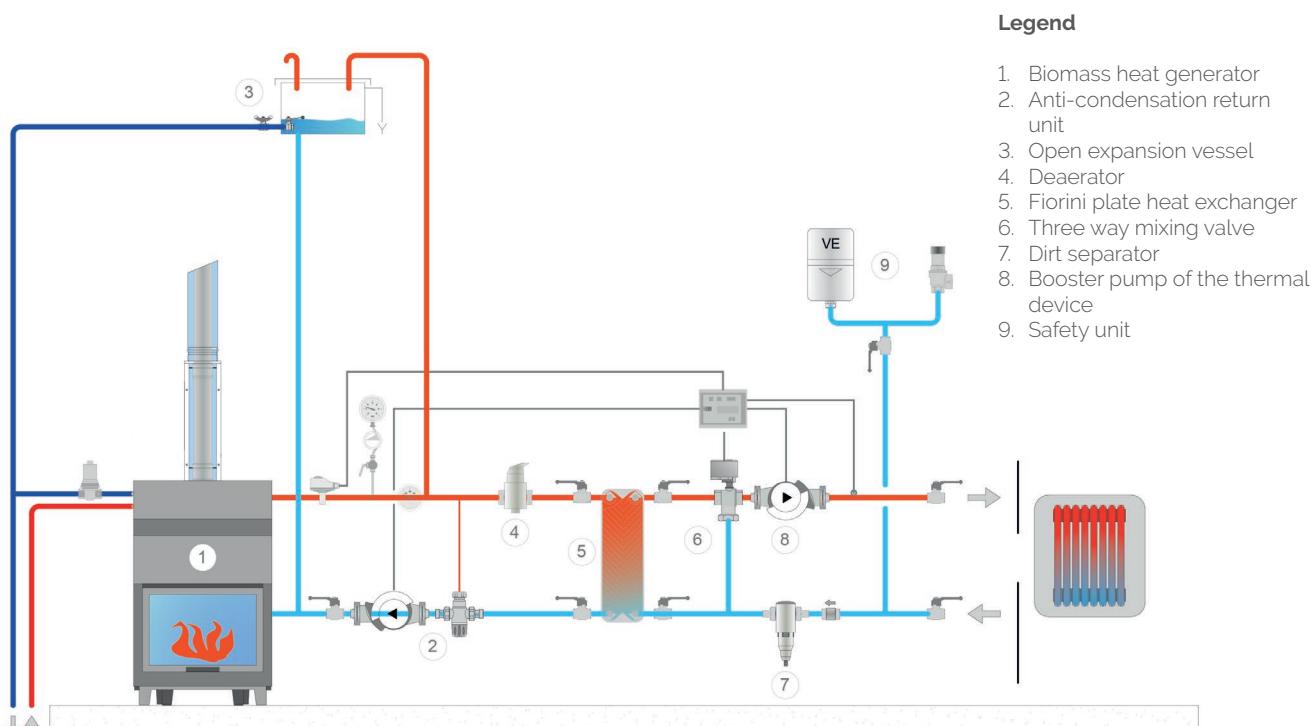

Separation between thermal source and device

(Closed expansion tank)

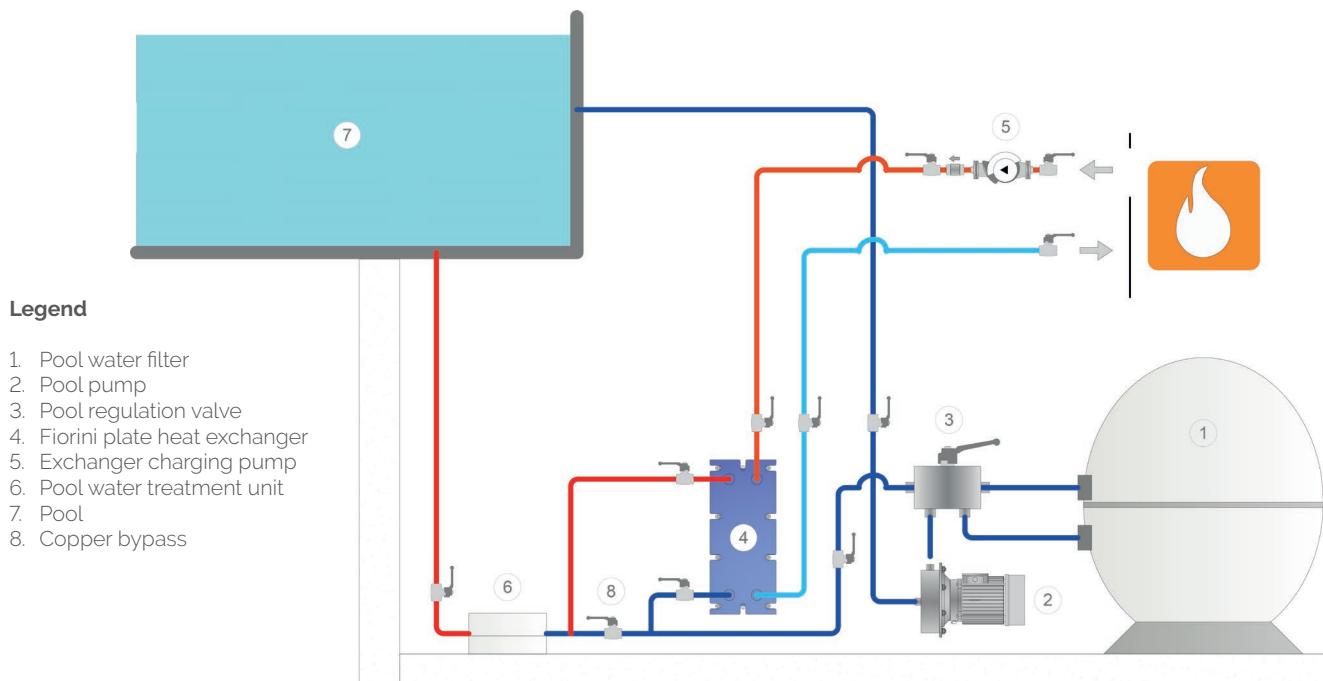

Separation between thermal source and device

(Open expansion tank)

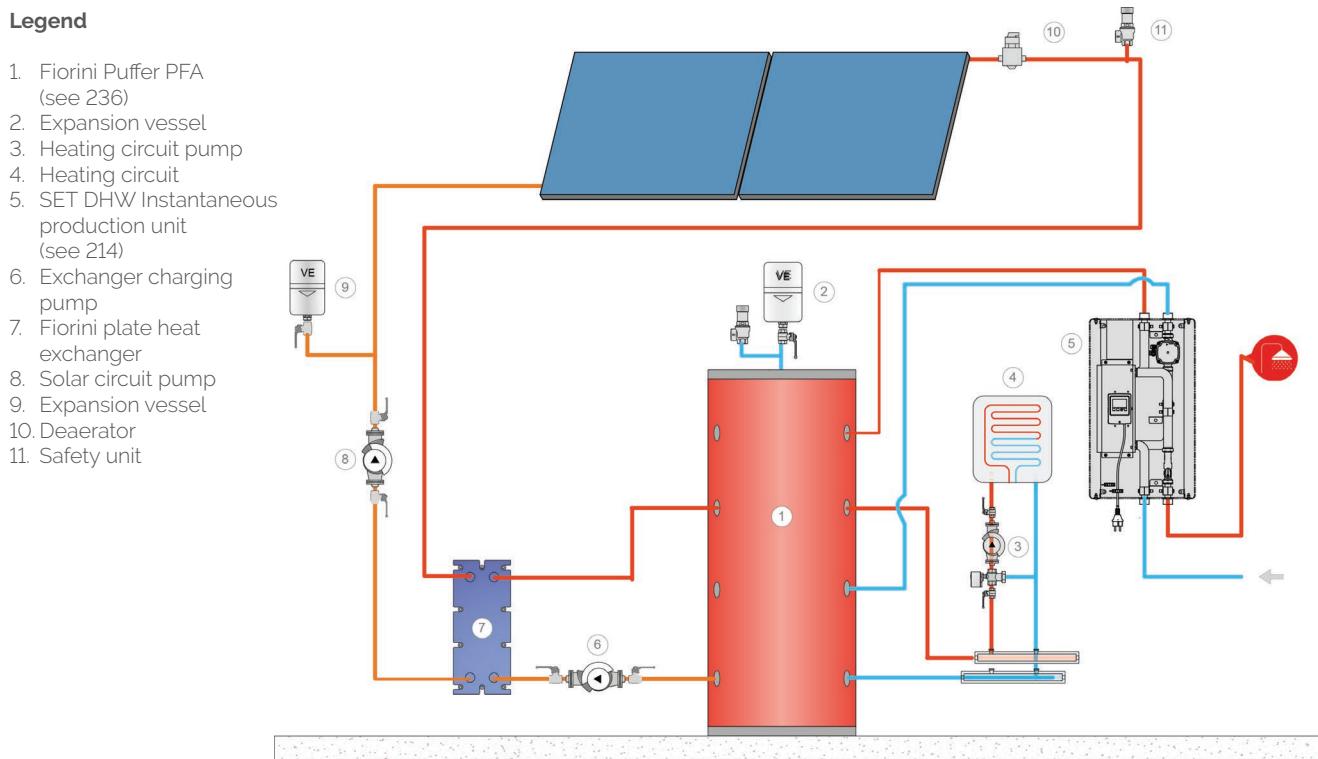

Plant Solutions

Systems for swimming pools

Systems for solar thermal

DATA COLLECTION FOR EXCHANGER SELECTION

For the correct dimensioning of an exchanger, at least 5 data on 7 * are mandatory and meet the following conditions:

- T.IN HOT > T.OUT COLD
- T.IN COLD < T.OUT HOT
- Temperatures and flow rates consistent with thermal power

If you do not know all the required data, describe the type of application in the appropriate field below.

CONTACT			
Applicant		Data	
Company		Ph.	
Email		Ref.	

GENERAL DATA			
Exchanger type	<input type="checkbox"/> Gasketed	<input type="checkbox"/> Brazed	
Power*			(specify u.m. kW or kcal/h)
Nominal pressure			(specify u.m. e.g. bar)

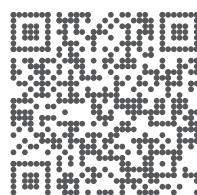

HOT SIDE		COLD SIDE	
Fluid		Fluid	
T IN*	(°C)	T IN*	(°C)
T OUT*	(°C)	T OUT*	(°C)
FLOW*	(specify u.m.)	FLOW*	(specify u.m.)
MAX loss	(kPa)	MAX loss	(kPa)

ADDITIONAL NOTES			
Type/ Diameter Couplings			
Plates material/ Couplings/Shelf			
Accessories	<input type="checkbox"/> anti-condensate tub (only for gasketed)	<input type="checkbox"/> insulation box	<input type="checkbox"/> feet set (only for gasketed)
Size Limits			
Type of application			

The QR-CODE allows you to access the online form for the dimensioning of exchangers. Following the wizard you can send the completed form directly to our technicians, who will answer you with the sizing required in a short time.

How to use the QR-CODE:

- Use a device like tablet, smartphone, 2 in 1 device.
- Install an application to read QR-CODE (if not already installed)
- Aim the device on QR-CODE
- Access the form online

The personal data included in this form will be processed according to current laws about privacy. Please see the privacy notice, full text is available at go.fiorinigroup.it/eng/privacy

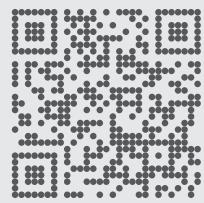

Filling this form you agree to the privacy notice and allow data processing.
