

DeLonghi Richmond & Agata Towel Rails

WARM YOUR BATHROOM - NOT JUST YOUR TOWELS

DeLonghi towel rails are an ideal complement to any central heating system. Available in either chrome or painted finish they warm up towels as well as providing some heating for the room. Commonly used in bathrooms they are also very useful in laundry areas or kitchens.

Electric elements can be fitted to the towel rails so they can be used without a central heating system or if the system is turned off (for example during the summer months). It is more cost effective however to install the towel rails as part of your system.

CHOICES TO SUIT ANY HOME: TWO STYLES, TWO PROFILES, MULTIPLE FINISHES

DELONGHI RICHMOND PLUS TOWEL RAILS

DeLonghi Richmond towel rails are a high quality, stylish accessory to any central heating system. Traditionally-styled bar towel rails, they are highly efficient as towel warmers and driers and the rails add a gentle, warm ambience to the bathroom. They are available in both Chrome and White finishes and matching fittings can be used. Both styles come in Parentesi (curved) and Linea (straight) and these options are held in stock at Central Heating New Zealand.

The Richmond Range: White Linea (left) and Chrome Parentisi (right)

DELONGHI AGATA TOWEL RAILS

These flat panel towel rail radiators are an extremely modern style that look good in any home. Central Heating New Zealand stock the white Linea (straight) version as standard in white, but anthracite finish variants are available via indent order. The colours options are limitless however, as the towel rails can be painted to match the interior decor of your home if you wish.

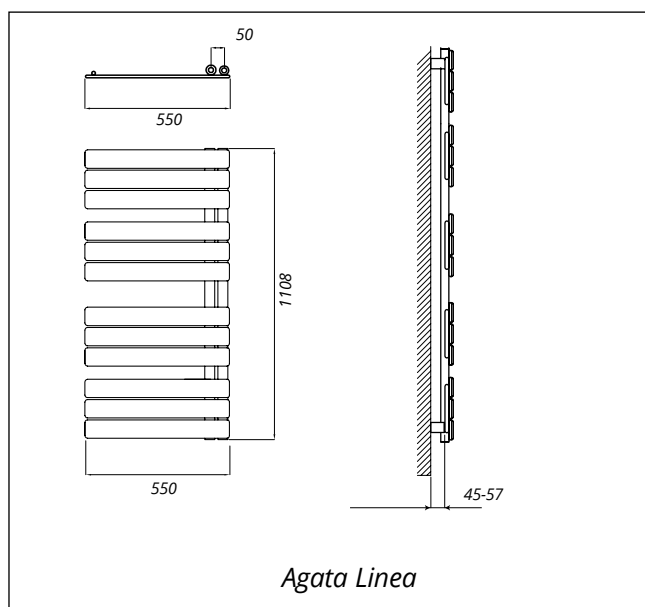

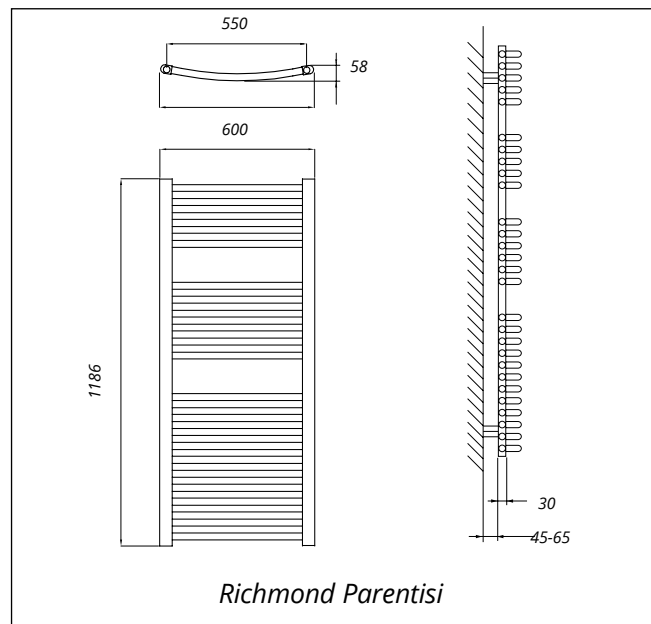

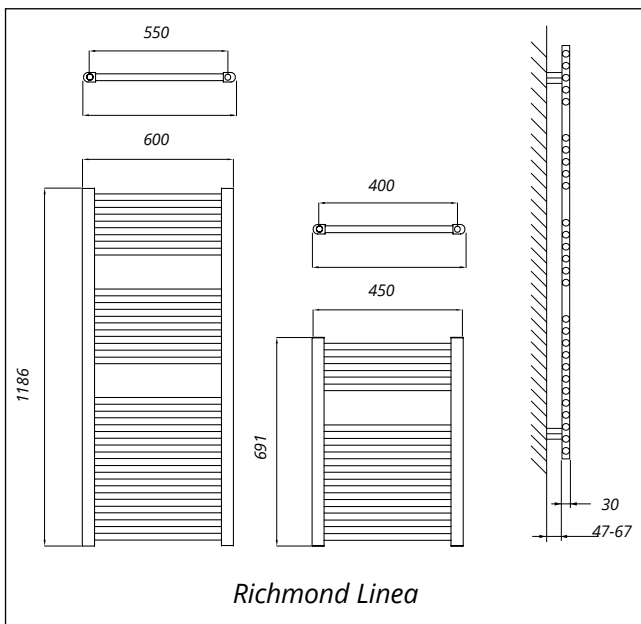

Agata Linea Towel Rail in Aranthracite (left) and white (right)
